_____

Career Objective

Dedicated to work is the key to success. Since high school, I've been interested in website building. I enjoy making new products . and watching as my own skills develop. I was able to intern at SCG while a university student. I gained knowledge about Agile methodology. I am seeking a challenging job opportunity in the position of Front-end Developer , Full Stack Developer and Software Engineer to grow my skills as a developer. Utilizing a variety of tools for developing websites and resolving issues that arise at work, I started looking for a front-end developer job as soon as I graduated.

_____

Work Experience

The Siam Cement (Thung Song) Co.Ltd. (Nakhon Si Thammarat, Thailand)

- Responsibility: develop a Scholarship System
- Use case Diagram
- Material UI Design
- Github comunicate
- Experienced with Golang Gin development using React framework, SQLite and Node.js

_____

Education

Suranaree University of Technology
2020 – 2024
Institute of Engineering, Bachelor of Engineering (Computer Engineering)
Nakhon Ratchasima, Thailand
Second Class Honors with 3.43 GPAX

- Software Engineering
- System Analysis and Design
- Data Structures and Algorithms
- Object-oriented technology
- Problem Solving with programming
- Computer Statistics
- Introduction to Blockchain Technology
- Machine Learning Fundamentals
- Natural Language Processing

_____

Projects

Minor Project : Fideyourtracks
Aug - Oct 2023
Music - Web Application & Audio NFTs Marketplace

- My Music player web application and have a home UI reference by SoundCloud
- I improved my express.js and React skills to make my own music player for this project, Learned how to build RESTful APIs by express.js, Created interface by Javascript, State Management using Redux toolkit
- building basic features of Standared Music Player with the use of MERN stack
- Add a feature that challenges me to learn Solidity and Ganache to code Smart Contract base on ERC-721 for listings, minting, wallets, and Metamask bidding for listing or Buying audio NFTs on the marketplace

Technologies Used : Javascript, Tailwnd CSS , MongoDB, Express.js, React Js, Node.Js , Solidity, Ganache, Typscript, Next.js

Mini e-commerce Shoe
Oct - Nov 2023
Project for Advanced Web Application Course

- A web application for lerning e-commerce that want to Buy and sell Sport shoes online.
- Objective is Building Website for customers interested in sports shoes
- Practical MEAN stack for coding API, middleware architecture, Payment functionality
- Feature LINE chat Bot with LINE Developer and Dialogflow to trained Natural Language Processing

Technologies Used : MongoDB, Express.js, Angular, Node.Js, LINE Developer, Dialogflow

_____

Skills

Programming and Development Skills

o React	o Next.js	o Angular	o Vue.js	o Laravel
o Tailwind	o HTML5	o CSS3	o Bootrap	o JavaScript
o Typescript	o Solidity	o Golang	o Python	o PHP
o Node.js	o Express.js	o C/C++	o C#	o Java
o SQLServer	o MongoDB	o Docker	o VS Code	o Git
o Mysql	o SQLite			

Other Skills

- Agile Technology.
- Can designed UX / UI.
- System Analysis and Design implement Database Structures.
- Experience with Ubuntu.
- understanding of Supervised and Unsupervised Machine Learning algorithms.
- Intermediate English Languages.
- Native Thai Languages.

_____

Reference

Paramate Horkaew
a supervisor of my Computer Engineering Project
Email : phorkaew@sut.ac.th
Suranaree University of Technology,111, Suranaree Muang Nakhon Ratchasima, Thailand

_____

Interest

- Generative AI
- Software Development
- Big Data
- Healthcare
- Blockchain Technology
- Non-Fungible token
